

## GroundSure Energy Search

This new search is now available for a fee of £20 for residential properties and £50 for commercial properties. Renewable energy is a hot topic, and will remain so for the foreseeable future.

Our Head Office is based in Sussex and the Fracking protests in Balcombe dominated the news here for weeks. We anticipate that it will become of great importance for clients to know whether the property they own, or indeed wish to buy, is within a licence block.

The search covers a 25km radius and will identify nearby Wind Farms, Solar Farms, Power Stations and existing and upcoming applications for the exploration of the extraction of shale gas and oil.

In addition, there are a whole suite of searches now available for clients, including developments checks for the area you or your client is buying in and subsidence checks.

For information on the full suite of searches now available, please contact one of our team.
